DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

Claims 1,2,4-8, and 14 are allowable over the prior art of record.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record neither teach nor render obvious the overall claimed combination of a dispensing canister add on component assembly comprising an adhesive backed film, wherein the first end region of the first section of the film and the end regions of the second section of the film do not overlap as cited in claim 1, lines 17-19; and a method of affixing an add-on component comprising the step of mounting an adhesive-back film circumferentially about the canister component interface, wherein the first section of the film extends across the canister component interface with the first end region of the first section of the film overlapping the second end region of the first section of the film while the end regions of the second section of the film do not overlap as cited in claim 14, lines 13-16. Therefore, the invention defined in claims 1 and 14 is considered novel.
